

Clean Mind Clean Heart Enhancement Group

(Our Efforts For A Cure)

Summer Initiatives 2014

September 16, 2014

Subject: **Producing Clean Water is Important.**

Hi Humanitarian Workers,

Greetings and welcome to this week's **Clean Mind Clean Heart Enhancement Group**(Our Efforts For A Cure) **Summer Initiatives 2014** work session entitled "**Producing Clean Water is Important**".

The term Osmosis (<http://en.wikipedia.org/wiki/Osmosis>) is used for addressing molecules. Reverse osmosis (http://en.wikipedia.org/wiki/Reverse_osmosis) is used for cleaning dirty water and removing salt from water. The world needs massive amount of clean water in several areas. If we focus on the Lake Mead project (<http://www.scpr.org/programs/take-two/2014/06/18/37980/the-last-straw-the-construction-project-that-could/>) I am not sure how many millions (if not billions) gallons of water is needed to restore Lake Mead to its natural (or acceptable level), however due to certain conditions it is imperative for the people to realize that to maintain a state of goodness is very important for the health and needs of our society.

Right now many parts of the world are really suffering from poverty due to lack of proper care by various management structures. In areas such as "the ship grave yards (<http://www.dailymail.co.uk/news/article-2324339/Worlds-biggest-ship-graveyard--huge-tankers-cruise-liners-scrapped-shorefront-workers-toil-2-day.html>) The hazardous work of cutting up the ships and the amount of contamination of the waters is

the area has done sever damage to the waters in the area. This damage also affects other industries such as fishing and health related issues related to dirty water and usage of it caused by the factors of rust.

Reverse Osmosis is a process that is used for removing impurities from water, I am not totally formilar with the technology, the question is can the technology portable enough to be used in a person's home or in a local community center. So individual families can focus on producing clean water to assist with filing the needs of Lake Mead

http://www.huffingtonpost.com/2014/07/19/lake-mead-drops-lowest-levels-ever_n_5601332.html.

If a family can produce 700 to 2500 gallons of clean water a week, When the clean water for Lake Mead project is finally approved, then the family can earn 500 to 1500 per week if the water was sold between (35-75 cent per gallon).

It would take some work, however the Lake Mead authority in conjunction with EPA and the United States government(s) to buy reverse osmosis cleaned water from approved clean water production centers will be a valuable asset to tour society. This way over a period of time and with the proper cooperation of certain groups and organizations Lake Mead can be restored to its proper level.

For the motivation music and philosophy we will look at the two songs **Flashlight** and "**Children of Production**" by Parliament Funkadelic.

As we review the problems of most communities the issue of labor laws and values of self worth is of a major factor. What is so amazing about New York is that many people complain about the garbage on the streets and subways however they fail to utilize the massive manpower that is just sitting in the New York shelter system to have them help clean it up.

The saddest problem going on in New York (and really the country) is the legal System. Although the courts most famous phrase is "**We want the Truth The Whole Truth and nothing but the truth**". Is not really working in the legal community. Besides the massive legal abuse

in the court system there is also too much abuse in the over crowded prison system. The prisons most likely contain innocent people as well as people arrested for distributing marijuana. The major factor is that most lawyers are charging big money for various legal support. Although Legal Aid tries to address the needs of the communities the reality of the situation is many people are actually illegally imprisoned due to the attitudes of the lawyers (and some lawmakers) in the global system.

Another area where obvious abuse exists is also with the in church systems. The crucifixion of some people by the governments and other practitioners of the example set by the Catholic Church as created an ill spirit within the universal management system.

On one side of the [Hara Krsna](#) religious organization created by [A. C. Bhaktivedanta Swami Prabhupada](#) they preach the importance of being a vegetarian hopefully for the purpose of respecting life. Then on the other side they display [Arjuna](#) trampling over his own people possibly during the time of observing the battlefield.

Now exactly where is the battlefield and is the location actually approved by the Camel ford House in London England (<http://www.churches-together.net>) greatly affects the zoning laws within certain communities. Should New York be labeled a war zone by them matters. If so then certain things will be allowed to happen because of its spiritual status labeled by them and agreed to by others.

Another gross violation of the legal system breach by the courts is the [Lynne Stewart case](#). Where it seems many of her friends and supports marched, protested and petitioned the courts in her behalf, however it seems the judge may have found an element of treason in her character for representing a Muslim who was charged with being involved with the planes crashing into the Twin Towers in New York on September 11, 2001.

The questions of if their decisions to imprison her and others affects the spiritual position of America. The resources of evil has a way of mirroring the energy within the communities and society overall.

For the most part, the Lynne Stewart case it seems she was a good person and the New York legal system chose to punish her and many others (i.e. Stop and Frisk abuse cases

<http://www.reuters.com/article/2013/10/31/us-usa-newyork-stopandfrisk-ruling-idUSBRE99U1A120131031>) maybe just for monetary gains.

Another major continued horror story of the war against Islam and people of color is president Obama most recent request for bombing (air strikes) in Syria and Iraq. I am not sure what happened to the Martin L. King, Jr. march for world peace via non-violence methods, it is clearly lost with the Obama administration.

Islam by definition means submission to God by people of prayer for the health and needs of our society. The greeting of **As-salamu alaykum** is there greeting for peace be upon you". Islam is not suppose to be the abusive war state that we see going on across the globe. The issues of can a war against the people of prayer be appreciated by our Creator.

No certainly not.

And warring Islam by bombing their countries and giving them more guns to kill each other is not the solution the world needs. Dialogue has to be brought forward with diplomacy not more guns to be lost in another Muslim country like what happened in Afghanistan (<http://www.gao.gov/new.items/d09267.pdf>). President Obama is really wrong in requesting bombing in Syria and Iraq and is seriously jeopardizing the world safety by warring Islam.

I had the opportunity to attend the [Symposium on Gun violence present by the families of 9/11 at Harlem's State Building](#) on September 5th 2014.

While the panel of speakers for both discussions were from the New York communities and well rooted in the local and national activities. Who was clearly missing from the panel were Congressman Charles Rangel as well as the majority of Harlem insiders.

It is clear the several facts related to the planes crashing into the Twin Towers on September 11, 2001. Many people in the New York area feels the event was planned by the United States government and / or with several affiliates.

As stated in our previous work session “**Inside ~ Outside Talks 2014 “Early Announcement Letter”**” several issues were covered including the importance of working with Dr. Masaru Emoto book: “**The Hidden Messages in Water**” regarding efforts to bring more focus to cleaning up the bodies (and) of waters.

For starting efforts, we are not looking for people to have a chemistry set in their homes. The first segment should really only consist of using paper towels. After completing the task of collecting the dirty water, the paper towels can be used for filtering out (some) of the dirty from the water.

Efforts should include reviewing various prayers while reading about the importance of how to talk to water and placing the efforts and results on your website. You can also write about what you feel about the prayers you are working with.

If you are working with a group of people within your community it could be fund and very educational discussing the various prayers that you know about and its meanings.

These are some videos regarding “**Books and efforts for Talking to Water**”:

Children of Abraham: Jews and Muslims in Conversation.

<http://s235.photobucket.com/user/jrbranchjr/media/2112-160020.mp4.html>

Discussion of Dr. Emoto's books.

<http://s235.photobucket.com/user/jrbranchjr/media/2212-220403.mp4.html>

We also know that if you chose to work with the efforts of the Reform Jews and Muslims in their conversational efforts it could add to the benefits of assisting with efforts for cleaning up the water and communities.

The URLs to the interfaith dialogue project “The Children of Abraham” Jews and Muslims in dialogue are as follows (<http://urj.org/> and www.ISNA.net).

Enough for now.

This concludes this work session “**Producing Clean Water is Important**” Until the next work session **Clean Mind Clean Heart Enhancement Group** (Our Efforts For A Cure) **Summer Initiatives 2014 “America’s Debt and the Health of the world”**.

Take care,

Sincerely

James R. Branch
